

Zohaib Bawani

Full-Stack Software Engineer

zohaibbawani05@gmail.com | +92 315 2734817 | linkedin.com/in/zaibing | github.com/Muhammad-Zohaib-Bawani

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 4+ years of experience shipping production web applications end to end. Builds with Next.js, React.js and TypeScript on the frontend and .NET Core (C#), Node.js and Express.js on the backend, over SQL Server, PostgreSQL and MongoDB with REST and GraphQL APIs. Has delivered enterprise, government and SaaS platforms, including Azure deployment, Azure DevOps CI/CD, and AI-assisted development with OpenAI, Claude and Codex.

CORE COMPETENCIES

Full-Stack System Architecture • REST & GraphQL API Design • AI Integration • CI/CD Pipelines & DevOps Practices • Cloud Infrastructure (Azure) • Database Design & Performance Optimization • Agile Software Delivery

WORK EXPERIENCE

MicrosysX — Fullstack Software Engineer

Aug 2024 – Present

- Build full-stack products end to end in Next.js, TypeScript, .NET Core (C#) and SQL Server, owning system design, database schema, APIs and production deployment.
- Develop scalable Next.js frontend architectures with reusable component libraries, SSR/ISR rendering strategies and predictable state management.
- Engineer .NET Core Web APIs and SQL Server data layers covering business logic services, role-based access control and query optimization for data-heavy operations.
- Integrate LLM APIs (OpenAI, Claude) into product features, and use AI development tooling (Codex, GitHub Copilot, Claude Code) for scaffolding, test generation and documentation.
- Set up and maintain CI/CD pipelines on Azure DevOps with branch policies, automated build and test gates, and rollback-capable releases.

Dawn News — IT Department — Frontend Engineer

May 2023 – Jul 2024

- Re-platformed legacy broadcast web properties to Next.js and React, improving Core Web Vitals and page load performance for a high-traffic national news audience.
- Applied React/Redux patterns — code splitting, memoization and structured state management — to reduce bundle size and simplify feature development.
- Integrated Firebase and MongoDB data sources to power live news feeds and dynamic content modules that editorial teams could update without engineering involvement.
- Reviewed pull requests and mentored junior developers on component design, reusability and accessibility.

Steel Marketing — Frontend Developer (Remote)

Nov 2022 – May 2023

- Built custom WordPress, WooCommerce and headless CMS sites for B2B industrial clients, turning business requirements into responsive, maintainable frontends.
- Automated CRM workflows by integrating GoHighLevel and HubSpot APIs, removing manual lead entry and giving sales teams pipeline visibility.
- Standardized reusable component and template patterns across client projects, shortening build time on repeat engagements.

KEY PROJECTS

Hayya Visa System — Government Visitor Services Platform (Qatar), three interconnected systems

Tech Stack: Next.js, .NET Core, C#, SQL Server, Azure AD, REST APIs

- **B2C Visa Portal:** built the applicant-facing frontend in Next.js, integrating .NET Core APIs for identity verification, document submission and real-time status tracking.
- **B2B Partner Platform:** built the portal used by travel operators and corporate accounts to submit group applications, manage compliance documents and track service requests.
- **Admin & Operations Portal:** built the internal system for approval workflows, audit trails, status escalation and operational reporting, secured with Azure AD role-based access control.
- Contributed to API contract design with government, logistics and technology stakeholders.

MailAfiniti — Business Email Hosting Platform (mailafiniti.com)

Tech Stack: Next.js, React.js, TypeScript, Tailwind CSS, REST API Integration

- Developed the client-facing web platform for a business email hosting product: custom-domain email, mailboxes, aliases, webmail and guided migration.
- Implemented a responsive UI in Next.js and Tailwind CSS — product tour, feature pages, plan comparison, FAQ and onboarding — on a reusable component and layout system.
- Built subscription and pricing interfaces for tiered mailbox plans, including monthly and annual billing options and free-trial sign-up flows.
- Translated email-hosting concepts — DNS/MX, SPF, DKIM and DMARC setup, IMAP/SMTP client configuration, migration from Google Workspace, Microsoft 365 and Zoho — into clear customer-facing flows.

Event Management & Ticketing System

Tech Stack: .NET Core, C#, Razor, jQuery, Ajax, SQL Server

- Extended a centralized event operations platform handling ticketing, real-time seat availability, guest check-in, accommodation and flight coordination.
- Built booking and check-in workflows with Razor views and jQuery/Ajax partial updates against .NET Core controllers and SQL Server, and refactored legacy modules to reduce duplication and align with MVC patterns.

Bow Valley Chauffeur — Ride Booking Platform (bowvalley.com)

Tech Stack: Node.js, Express.js, MongoDB, jQuery, Stripe

- Built the booking platform for a chauffeur service, with customer scheduling and a REST API layer in Express.js and MongoDB covering booking lifecycle, driver assignment and automated confirmations.
- Implemented Stripe payment flows including payment intents, webhook handling for real-time payment status updates, and refund handling.

Lake Louise Tour & Travel — Tour & Transport Website (lakelouisetour.ca)

Tech Stack: WordPress, JavaScript, Responsive UI, SEO

- Built the client-facing website for a Canadian Rockies tour and chauffeur operator, covering tour, fleet and service pages with quote and booking enquiry flows.
- Delivered a responsive layout across mobile, tablet and desktop, with Google Maps and review embeds and on-page SEO.

TECHNICAL SKILLS

Frontend: Next.js, React.js, Nuxt.js, Vue.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Material UI

Backend: .NET Core Web API, C#, Node.js, Express.js, REST API Design, GraphQL, JWT, OAuth, Razor, MVC

Databases: SQL Server, PostgreSQL, MySQL, MongoDB, Redis, Firebase

Cloud & DevOps: Azure, Azure DevOps, Azure AD, GitHub Actions, CI/CD, Git, Vercel

AI & Development Tools: OpenAI, Claude (Anthropic), Codex, GitHub Copilot, LLM API Integration, AI-assisted Development

CMS & Integrations: WordPress, WooCommerce, Shopify, HubSpot, GoHighLevel, Stripe, Zoho Mail, SendGrid

EDUCATION

BS in Software Engineering — Virtual University of Pakistan

Web & Mobile App Development, Intensive Bootcamp — Saylani Mass IT Training (SMIT)
